

Team Up With Timo: Stories

Interactive storytelling and activities to improve language processing, story comprehension and core thinking skills.

Timo's Library contains six stories that are written in an explicit and redundant style so that students with significant language problems and other difficulties such as poor attention or memory skills have an opportunity to grasp the information presented.

Stories depict everyday events and are predictable. The language is simple yet complex enough for exposure to a range of concepts.

Team Up with Timo: Stories takes a unique approach in blending stories with activities that make understanding more manageable for students with a variety of language problems.

Story Comprehension

Receptive Language/Language Processing

- Following directions, simple and complex syntax, questions, vocabulary

Expressive Language

Story Retelling

Auditory Memory

Theory of Mind/Social Thinking

Thinking Skills

- Recalling, organizing, associating, classification, comparison, sequencing
- Analyzing and integrating information
- Inferencing and applying the concept

Other program features:

- Two levels: beginner and advanced
- Therapists/teacher controls for lesson customization
- Progress tracking and IEP reporting

*Runs on Windows 98 and higher & Macintosh OS 9.2 or higher.
Requires CD-Rom Drive, and 128MB RAM*

Timo's Think Tank features six thinking activities that reinforce concepts introduced in the stories in an entertaining and engaging fashion.

Fun animated reinforcers hold children's attention but don't distract from the key activity.
